Datasheet

7-in-1 Raptor III

Part No:
MA1290.K.LBICGRT.001

Description:

7-in-1 Shark Fin Style Combination Antenna with 2 Whiptail options, GNSS, 2*5G/4G MIMO, 2*Wi-Fi MIMO, VHF/UHF(TETRA)/LMR (130-150,350-470,700-900MHz) and AM/FM

Features:

- 1* Active GPS/GLONASS/BeiDou/Galileo L1/B1/E1
 - 2* Worldwide 5G/4G MIMO
 - 2* 2.4 GHz/5.8 GHz Dual-Band Wi-Fi MIMO
 - 1* Active AM/FM
 - 1* Whip with MiniUHF (M) Connector for VHF/UHF/LMR or 700-900MHz
- Housing Dimensions: 190 x 95 x 92mm, Whip Dimensions: 65 x Ø13mm
- Braided 3m cable assembly
- GNSS, AM/FM, 5G/4G MIMO: SMA(M) Connector
- Wi-Fi MIMO: RP-SMA(M) Connector
- Whip Option 1 - VHF/UHF(TETRA)/LMR covering 130-150MHz and 350-470MHz
- Whip Option 2 – LMR covering 700 - 900MHz
- RoHS & REACH Compliant

1. Introduction

The Taoglas Raptor III MA1290 is a high performance 7-in-1 “Shark Fin” style combination antenna. It provides multiple antenna connections in a sleek, covert enclosure and is suitable for all automotive and commercial trucking applications. The Raptor III has been engineered to be mounted directly on the vehicle roof and is supplied with 3m cables and SMA connectors as standard.

The Raptor III is designed to combine and active multiband GNSS (GPS/GLONASS/BeiDou/Galileo), 2*5G/4G Cellular MIMO, 2*Dual-Band Wi-Fi, Active AM/FM and comes with two VHF/UHF(TETRA)/LMR covering either 130-150,350-470, or 700-900MHz for regional specific applications. All high-performance antennas are packaged in a compact, robust, IP67 rated enclosure. The whip antennas attach to the rear of the enclosure covers all frequency bands used for specialist communication systems such as public safety and first responders.

The cellular antennas in the Raptor III cover all 4G, and the new Sub 6GHz 5G cellular bands offering efficiencies of up to 80%. Fallback to 3G and 2G bands are possible where 5G and 4G is not accessible. The high performing Wi-Fi antennas cover both the 2.4GHz and 5.8GHz Wi-Fi bands. The whip antenna covers the Terrestrial Trunked Radio (TETRA) bands between 380 – 470MHz as standard and can be customized for other communication frequency bands. It is connected via a threaded M6 Female connector to the M6 male connector on the enclosure. Low loss 1.5DS cables are used that can allow for longer cable installations if required.

The Raptor III has a robust, impact resistant, UV resistant, PC enclosure and is easy to install. It requires just one single M20 hole, unlike many other vehicle mount solutions currently on the market that require multiple mounting holes. This single hole mounting substantially reduces installation time & cost and reduces damage to the vehicle.

Typical Applications Include:

- Transportation and Fleet Management
- Autonomous Driving and Robotics
- FirstNet, First Responders and Emergency Services

The cables, connectors and whip are fully customizable, the antenna is supplied with two whip antennas in the package. One longer whip for wideband specialist comms and a short whip for LMR only. For further information or installation instructions contact your regional Taoglas customer support team.

12pcs MA1290.A.LBICGRT.001 per Carton
Dimensions: 506*490*250mm
Weight: 11.67Kg

8. Installation

Installation Instructions

Raptor III Series

7-in-1 Permanent Mount Combination Antenna

A Introduction

The Taoglas Raptor III is an external combination antenna designed for mounting on the roof of a vehicle. The Raptor III can accommodate a combination of up to 7 antennas in one sleek housing. One 22mm(0.86") hole is required when installing this antenna. The cables are fed through this hole and secures the antenna to the surface with nut and washer.

The Raptor III is IP67 waterproof rated and includes a rubber base to provide a seal against water ingress.

Electrical Safety

The Raptor III MA1280 contains an active GPS/GNSS antenna.
Rated voltage: 3-5VDC Rated current: 24mA maximum

The supply to this device must be provided with over-current protection of 1A maximum.

Power consumption@1.8V (mA) 4.5 mA

Power consumption@3.0V (mA) 10 mA

Power consumption@5.5V (mA) 24 mA

B Mounting & Location

The Raptor III can be mounted on any surface, without the need for a ground plane. When mounting on a vehicle roof panel ensure to mount on a flat surface. When mounting the Raptor III, it should be placed as far as possible away from other roof-mounted features such as the aircon unit, light bar etc.

Sealing

In order to ensure that the installation is sealed against the mounting surface care must be taken regarding curvature of the mounting panel. It is highly recommended to install the antenna on a clean, flat and level surface. After installation the compression of the rubber boot against the mounting panel should be checked and a small bead of neutral cure silicone sealant can be applied around the periphery of the base of the antenna if required.

Mount on a flat surface

C Mounting Hole

When preparing to drill the hole, mask the area around the hole position to protect the surface. Drill a pilot hole through the panel and increase the hole size to 22mm(0.86") diameter. Ensure the drill bit does not contact the headliner. Deburr and clean the area around the hole carefully removing all waste. Remove paint and primer from under panel surface to ensure adequate earth contact by washer and nut. Apply petroleum jelly or paint around cut edge of the hole to prevent corrosion

D Installation of the Antenna

Feed the cables and thread through the hole. Position the antenna over the hole and press down onto the panel with pressure. A plastic washer with a slot for cable routing is added first followed by a split nut(M20). These provide options for vertical or horizontal cable routing. Secure the antenna in place by attaching the nut from the underside of the panel, only a final tighten by spanner is required.

Recommended Mounting Torque: 5N-m

E Routing and Connection of the Cables

The Cables supplied in a braided assembly for ease of installation. A power cable, colored red, is also supplied for powering the AM/FM. The heatshrink will denote which cable is which for ease of installation. Connect each individual connector to the correct port of the device, if any cable is unused please fit a 50Ω terminator to the individual connection.

G Notices

Caution

To comply with FCC RF Exposure requirements in section 1.1310 of the FCC Rules, antennas used with this device must be installed to provide a separation distance of at least 20 cm from all persons to satisfy RF exposure compliance.

Warning

Do not Operate the transmitter when someone is within 20 cm of the antenna.
Do not operate the equipment in an explosive atmosphere.

European Waste Electronic Equipment Directive 2002/96/EC

Please ensure that your old Waste Electricals and Electronics are recycled do not throw them away into standard waste.

Directive 2014/53/EU Radio Equipment Directive (RED)

Harmonised Standards and References:

EN 301 489-1 (V2.2.1): ElectroMagnetic Compatibility (EMC) standard for radio equipment and services; Part 1: Common technical requirements. Referencing CENELEC EN 55032 Class B.

Waiver: This document represents information compiled by Taoglas to the best of our current knowledge. This is not intended to be used as a representation or warranty of fitness of the products described for any particular purpose. This document details guidelines for general information purposes only. When planning installations, always seek specialist advice and ensure that the products are always installed by a properly qualified installer in accordance with applicable regional laws and regulations.

9.6 Wi-Fi performance over different cable lengths

Wi-Fi MIMO			
Frequency (MHz)	Cable Length	2400~2500	5150~5850
Efficiency (%)			
MIMO 1	0.3m	71.4	80.4
	1.0m	56.5	55.7
	2.0m	40.4	33.0
	3.0m	29.0	19.5
	5.0m	14.8	6.9
MIMO 2	0.3m	74.9	90.2
	1.0m	59.3	62.4
	2.0m	42.5	36.9
	3.0m	30.4	21.8
	5.0m	15.6	7.6
Average Gain (dB)			
MIMO 1	0.3m	-1.5	-1.0
	1.0m	-2.5	-2.5
	2.0m	-3.9	-4.8
	3.0m	-5.4	-7.1
	5.0m	-8.3	-11.6
MIMO 2	0.3m	-1.3	-0.5
	1.0m	-2.3	-2.1
	2.0m	-3.7	-4.3
	3.0m	-5.2	-6.6
	5.0m	-8.1	-11.2
Peak Gain (dBi)			
MIMO 1	0.3m	4.1	6.1
	1.0m	3.1	4.5
	2.0m	1.6	2.3
	3.0m	0.1	0.0
	5.0m	-2.8	-4.5
MIMO 2	0.3m	3.8	7.1
	1.0m	2.8	5.5
	2.0m	1.3	3.2
	3.0m	-0.1	0.9
	5.0m	-3.0	-3.7

Changelog for the datasheet

SPE-24-8-118 – MA1290.A.LBICGT.Y.001

Revision: B (Current Version)	
Date:	2024-06-06
Notes:	Updated cable length from 5m to 3m.
Author:	Gary West

Previous Revisions

Revision: A (Original First Release)	
Date:	2023-05-08
Notes:	
Author:	Jack Conroy
