Description

Wideband Cellular 90x15mm PCB Antenna (617-6000MHz) with Black 180mm 1.37 Cable and I-PEX MHF1

Features:

High-performance PCB Cellular Antenna
Global Cellular Coverage: 617-6000MHz
Peel and Stick Adhesive or Hole Mounting Options
Dims: 90 x 15 x 1.06mm
Cable: 180mm of 1.37 Coaxial Cable (Black)
Connector: I-PEX MHF1
RoHS & Reach Compliant

1. Introduction

The Taoglas PC60 is a high-performance PCB antenna specifically designed for 5G/4G cellular IoT devices and applications. Covering the full bandwidth from 617-6000MHz, the small footprint and super slim design offer exceptional integration capabilities. At just 90 x 15mm, it is easily installed with minimal design requirements. Engineered for seamless integration, either on or off the main device PCB, the 3M peel and stick adhesive on the back makes it easy to integrate. Small through holes allow for an alternative mounting option where adhesive might not be appropriate. The design eliminates the need for complex matching or tuning, allowing for quick and easy installation, minimizing your overall design cycle.

This antenna features a 1.37mm diameter RF cable equipped with an I-PEX MHF1 connector, ensuring reliable and robust connection to the device. With a frequency range of 617-6000MHz, the antenna supports a wide range of 5G, LTE, and other global cellular bands, delivering high efficiency to assist with PTCRB certification.

Typical applications for the PC60 antenna include:

- Network devices, Gateways and Routers
- Remote Monitoring and CCTV Cameras
- Point of Sale Terminals
- Digital Signage

The antenna's compact design includes a 180mm cable feed, making it an ideal solution for applications where space is limited without compromising on performance. Whether for IoT devices, cellular modules, or other wireless communication products, this antenna ensures optimized performance across a wide range of frequencies. For an alternative mounting option, the PC66.07.0150Q with long end side feed is also available.
